

## Project Planning Phase

### Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

|               |                             |
|---------------|-----------------------------|
| Date          | 18 October 2022             |
| Team ID       | PNT2022TMID37289            |
| Project Name  | CAR RESALE VALUE PREDICTION |
| Maximum Marks | 8 Marks                     |

### Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

| Sprint   | Functional Requirement (Epic) | User Story Number | User Story / Task                            | Story Points | Priority | Team Members                                 |
|----------|-------------------------------|-------------------|--|--------------|----------|--|
| Sprint-1 | Welcome Page                  | USN-1             | Welcome page for the user                    | 20           | Medium   | Tanmay<br>Niranjan<br>Shreechander<br>Suriya |
| Sprint-2 | Input page                    | USN-2             | As a user, I should be able to give input    | 5            | High     | Tanmay<br>Niranjan<br>Shreechander<br>Suriya |
| Sprint-2 | Data pre-processing           | USN-3             | Processing the raw data for prediction       | 10           | High     | Tanmay<br>Niranjan<br>Shreechander<br>Suriya |
| Sprint-3 | Model Building for prediction | USN-4             | Building model for accurate price prediction | 10           | High     | Tanmay<br>Niranjan<br>Shreechander<br>Suriya |

|          |                                |       |   |    |      |                                       |
|----------|--------------------------------|-------|---|----|------|---------------------------------------|
| Sprint-3 | Integrate the model with Flask | USN-5 | The model needs to be integrated with front end   | 20 | High | Tanmay Niranjn<br>Shreechander Suriya |
| Sprint-4 | Train the model on IBM Watson  | USN-6 | Model needs to be trained for accurate prediction | 20 | High | Tanmay Niranjn<br>Shreechander Suriya |

**Project Tracker, Velocity & Burndown Chart: (4 Marks)**

| Sprint   | Total Points | Story | Duration | Sprint Start Date | Sprint End Date<br>(Planned) | Story Points Completed (as on Planned End Date) | Sprint Release Date<br>(Actual) |
|----------|--------------|-------|----------|-------------------|------------------------------|---|---------------------------------|
| Sprint-1 | 20           |       | 6 Days   | 24 Oct 2022       | 29 Oct 2022                  | 20  | 29 Oct 2022                     |
| Sprint-2 | 20           |       | 6 Days   | 31 Oct 2022       | 05 Nov 2022                  |   |                                 |
| Sprint-3 | 20           |       | 6 Days   | 07 Nov 2022       | 12 Nov 2022                  |   |                                 |
| Sprint-4 | 20           |       | 6 Days   | 14 Nov 2022       | 19 Nov 2022                  |   |                                 |
|          |              |       |          |                   |                              |   |                                 |
|          |              |       |          |                   |                              |   |                                 |
|          |              |       |          |                   |                              |   |                                 |
|          |              |       |          |                   |                              |   |                                 |

**Velocity:**

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{\textit{sprint duration}}{\textit{velocity}} = \frac{20}{10} = 2$$

#### **Burndown Chart:**

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.
